Please measure very carefully because the comfort and the looseness of your suit depend on it!

- ask someone to take your measurements because it is easier and more precise
- when measuring wear that clothing that you usually wear under your jumpsuit
- if you have special needs (e.g. you want tight or loose suit, you usually dress under the suit), write it in the comments: **DO NOT TAKE FROM OR ADD TO THE MEASUREMENTS**
- we revise and check the received measurements and we report you if we see any mistakes. But we cannot take responsibility for any mistakes made during the measurements and therefore give warranty for it.

Taking measurements

A: Circumference of neck

B: Circumference of chest in deflated state of arms during having normal breath

C: Waist on the line of trousers

D: Hip is always the thickest and the bottom is the widest

E: Circumference of thigh on upper side
