DBC S-LINE

i ABOUT

DBC S-LINE This fully printed, premium edition suit is a new segment of our DBC series. The suit comes with custom made tailoring, and a special print design on the taslan parts. This model is amongst the first custom printed suits in the market with an epic premade design. You can even adjust the color gradients, just write your idea in the comment section or drop us an email. To get yours, just gotta do few easy steps: choose your favorite color, suit settings and options, take your measurements and fill your data.

FREEFLY FEMME

Freefly Femme

i ABOUT

Please meet our first design specifically dedicated to skydiver women!

The main conception was to create a dress which is more than a sportswear since Intrudair wants to impress the eternal beauty of women and highlight their silhouette with curved insets around the body. The elastic parts are produced by Brunico WX, a very strong elastic material so You can experience the advantage of body shaping, which also helps You doing elastic movements without any limits.

FFC+ SUIT

C+2

FREEFLY

ABOUT

We recommend this suit for Camera folks, AFF instructors and last but not least for Fun Jumpers, because it's slim on the body, and both arms and legs are loosely tailored. It is a very comfortable model thanks to the windproof Brunico WX elastic parts.

This is an ultimate dropzone suit, since it can be useful in such a wide speed range thanks to the proper material selection, and the ideal cut of the arms and legs.

MATERIALS

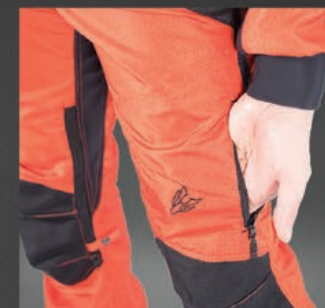

- taslan or nylon
- Cordura 1000 reinforcements
- Brunico WX elastic parts

FEATURES

- fit body cut
- Meidum/Slow fall rate
- strengthened cordura knee and bottom
- windproof elastic parts
- technical leg cuff

EXTRA OPTIONS

FREEFLY EXP

i ABOUT

By designing the suit we tried to have the minimum elastic elements to make the suit most homogen, and because the elastic material gets wear out the fastest of all the materials we have by the extremely active tunnel hard usage. We recommend to have this suit mostly for tunnel instructors, and dynamic flyers. Intudair is proud to achieve the comfortable sense while flying in the EXP, which -meantime- also allows free movements with a help of innovative 3D design and curved tailoring lines.

🏀 MATERIALS

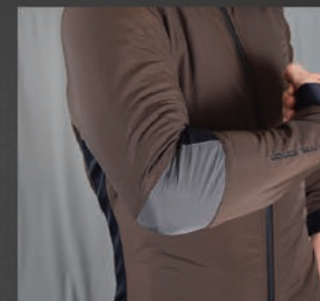

- Taslan 4-ply main parts
- Cordura 1000 reinforcements
- Brunico WX elastic parts

⚙️ FEATURES

- tight fit
- windproof elastic
- strengthened cordura knee
- windproof zipper

FREEFLY CF

FreeFly CF

i ABOUT

There have been new suit trends are occurring in the sport of skydiving worldwide lately. So we modified our freefly design to create a tighter and cleaner suit. The silhouette of the suit narrowly follows the anatomy of the body with a homogenic material use and 3D elbow and knee formation. The suit is tightly tailored on the upper parts of the body and around thighs. The elastic parts around the shoulders, between legs and side of the body will allow you to move much more comfortably.

g MATERIALS

WINTER SUIT

WINTER EDITION

i ABOUT

The freely winter suit is produced from 100% highest quality of softshell wind and waterproof materials with elastically comfortable soft lining layer inside. The most significant advantage of this kind of material is that it has a breathable membrane layer that lets water vapor out and prevents water from entering, also it's totally windproof. Finally, with a long and warm neck you won't get cold!

RW PRO male

RW PRO
ABOUT

There are plenty of new features, thanks to a lot of professional 4-way testing and development. We could increase both the comfort and safety level with this update! The neck carve is a tunnel-friendly deeper cut. We changed the shoulder-neck panel to fixed, avoiding some unwanted stretching. The grips' material got more stiff, they got larger, and we deepened its pockets. The back of the booties got reshaped, they follow your calf, boosting power on the legs, and decreasing unwanted vibration. We added anti-slipping Vibram soles for better grip.

MATERIALS

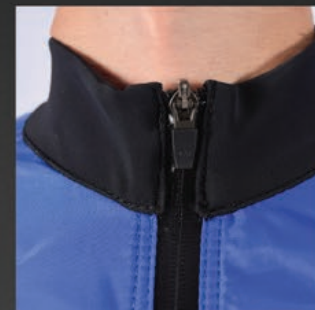

- Nylon base material with lining
- Cordura 1000 reinforcements
- Double Spandex lower arm
- Brunico NP back & neck parts

FEATURES

- Deeper neck carve
- Fixed shoulder arch
- Refined calf shape
- Windproof zipper
- Vibram soles

RWC S-LINE

RWC

S-LINE

i ABOUT

The custom printed RWC S-line is not just about the design, it comes with plenty new features.

The neck construction is new, deeper cut provides long term comfort. The shoulder-neck part got fixed, providing easier contacts between the blocks. The grips got a bit larger and more stiff, also got deeper pockets. The booties backside now follows your calf, increasing your control and avoids unwanted vibration. Vibram soles make your exits safer and easier, also handy in tunnel.

TRACKING SUITS

i ABOUT

Intrudair offers 2 different type of tracking suits. One is great from beginner level to advanced, just to enjoy the skydiving in tracking position. Pure fun. The other suit provides more performance as it has bigger surface, but it needs an experienced pilot to use. We recommend this suit for BASE jumpers with relevant background in tracking, but it's a good challenge from plane in tracking competitions as well.

g MATERIALS

- Nylon
- Brunico WX elastic parts

g FEATURES

- 3D air inlets
- looped cuffs
- printable material
- free hand movement

+ EXTRA OPTIONS

- optional bootie (only for plain tracking suit)
- cordura knee & bottom (only for ULTIMATE)
- rush order
- pick & tail pocket

Choosable:

Bootie: yes no

Cordura knee & bottom: yes no

WAHOO TRACKING

ONE-PIECE

i ABOUT

Welcome to Intrudair's newest tracking suit, which comes in one piece, and with extreme performance. The suit has a rapid start, and the glide ratio can easily go above 2, and it is easy to fly! You can choose if you want it with our without booties. In the development phase the main focus was on the safety, easy maneuverability and high speed. We did our best to max out the performance! Through the optimized air inlets, the inflation is super fast, providing fast and safe exits.

🏐 MATERIALS

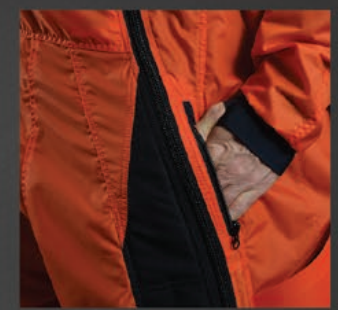

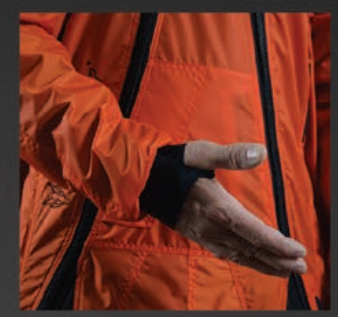

- Nylon
- Brunico WX elastic parts

⚙️ FEATURES

- 3D air inlets
- looped cuffs
- printable material
- free hand movement
- many pockets

+ EXTRA OPTIONS

- optional bootie
- backfly inlets
- rush order
- pick & tail pocket

HALF-A

HYBRID TR-WS

 ABOUT

Half-A Hybrid Suit is mostly created for BASE jumping, although it can be an option for those skydivers who dislike wingsuit discipline due to the limited arm movements, but still want to feel the horizontal flying.

This category is between Tracking and Wingsuiting, combined the features from both. The air pressure goes around the body, flows freely between the wings and arms.

Designed with: Antoine Laporte

 MATERIALS

- Nylon
- Brunico WX elastic parts

 FEATURES

- Lot of ribs
- Solid and smooth one-wing profile
- Inside pressure
- Two big inside pockets
- Free movement

 EXTRA OPTIONS

- Extre Pocket
- Windproof zipper
- Backfly inlets

PIRANHA 4

i ABOUT

Piranha 4 is the latest update of our entrance level all-around wingsuit. We adapted the leading edge solution from the barracuda series. We added a soft performance foam. The booties have been improved, the suit gained more stability and controllability. The shoulder zip-system had been changed. This is an ideal and long-term choice for first wingsuit with wide range of usability, not only for beginners!

MATERIALS

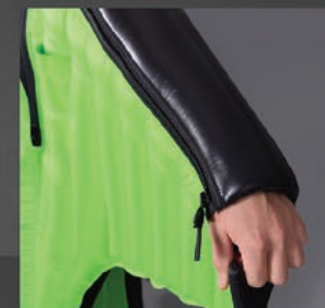

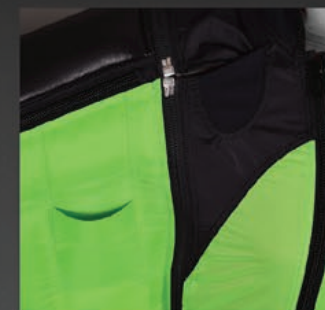

- Nylon
- Brunico WX elastic parts

FEATURES

- Soft performance foam

BARRACUDA FREESTYLE 2

i ABOUT

Very easy to fly, and even if You think on a barrel roll, it happens. Totally handy while backflying, and You can transform it easily to headdown. As no grips, You are able to grab your friend and having fun together. It gives You freedom in flights and clean deploy every time. And if You want to learn and do acro wingsuiting, then competing, then this is the right choice. You can be part of any kind of flock with this suit. Barracuda Freestyle 2 is able to fly fast and slow as well, agile and handy in one time.

o MATERIALS

- Nylon
- Brunico WX elastic parts

g FEATURES

- backfly inlets
- escape sleeves
- BASE sole
- zip-up cord

+ EXTRA OPTIONS

- printable design
- arm cutaway system
- leg cutaway system
- extra pocket
- tail pocket
- rush order

BARRACUDA 3

i ABOUT

The Barracuda 3 is a great all purpose suit. This intermediate surfaced suit gives You freedom of flight. Recommended about 40 wingsuit jumps before try, but You will be surprised when you feel just more time and glide with no difficulty in usage. Thanks for the grips You are able to tense the wings, and get some extra lift. Big Air inlets makes the start fast, and the „easy to pull“ cutted wingshape gives 100% percent competency for BASE jumps. Perfect choice for camerawork and challanging in flocks.

g MATERIALS

- Nylon
- Brunico WX elastic parts

g FEATURES

- 3D air inlets
- backfly inlets
- escape sleeves
- BASE sole
- zip-up cord

+ EXTRA OPTIONS

- printable design
- arm cutaway system
- leg cutaway system
- camera pocket
- tail pocket
- rush order

BARRACUDA POWER +

i ABOUT

This Wingsuit is more robust version of Baracuda Power, meantime by preserving the easy handling feature together with stability and speed. Power Plus has more arm wings surface, so that is why the performance gets bigger, which improves the flare and glide ratio.

We want to assure You that Power Plus is not a nurtured model at all, since we are talking about a completely new 100 % new generation member of Intrudair wing suit product range.

🏐 MATERIALS

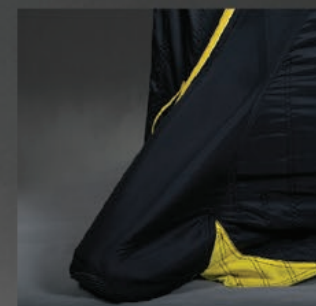

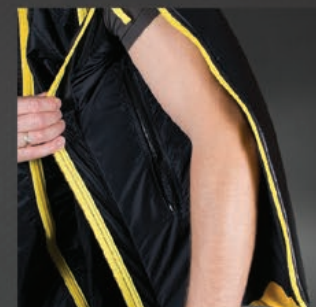

- Nylon
- Brunico WX elastic parts

⚙️ FEATURES

RS BASE

RS

BASE EDITION

i ABOUT

Intrudair proudly presents the new member of our high performance wingsuit line, The RS Base edition. During the development, we focused on maximizing its performance, safety and controllability. Thanks to the new air inlet design, the suit's pressurization is insanely rapid (2 sec), providing an extra fast start. The inner airflow system pushes the suit to shape - both arm and leg wing - almost instantly.

o MATERIALS

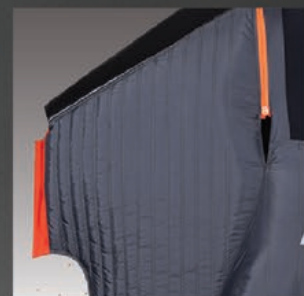

- Nylon
- Special Leading edge foam
- Brunico WX elastic parts

o FEATURES

- 3D air inlets
- backfly inlets
- escape sleeves
- BASE sole
- zip-up cord

+ EXTRA OPTIONS

PRINTING

ABOUT DIGITAL PRINTING

This technique is an open door for custom designs. It has the ability to print on the fabric without almost any color limitation, basically in photo quality. It doesn't have an extra layer feel, the fibres organically become one with the tint. Although embroidery has its own perks, digital printing can overcome with no color and gradient limitations.

Apart from our wide fabric color palette, you can select from our always growing premade patterns, or provide us graphics to print it on your suit. If you don't have a graphic, but you want to have a custom one, we can also do it with some extra fee, see details on webpage.

HOW DOES IT WORK?

The first option to select from our patterns in the coloring software. This case you have nothing extra to do, the original process applies. In case you have an own graphics, you can send it to us, and wait for confirmation. Before sending, please make sure that the quality is print-ready, at least 200 dpi, because we want to avoid pixelated or blurry graphics. If you want us to design custom graphics, contact us with your ideas and we will get back to you with a quotation and design plan.

PRICE DEPENDS ON THE PROPORTION OF PRINTED AREA OF THE SUIT
